

Pool operators have to combat a variety of challenges in their wet environments – corrosion, slipperiness, and unauthorised access to areas designated just for staff. All these factors expose operators to serious public liability risks. But now, there is a new solution to reduce risk to the public and to pool employees – composite fibreglass pit covers. Terra Firma Industries offers the ideal solution with our lightweight Aquatic range.

### Features include:

- Slip resistant surface to combat the wet environment for 20+ years
- Non-conductive
- Non-corrosive
- Lockable to prevent unauthorised access
- Lightweight for easy maintenance access
- Meets AS:3996 Class B: Strength to withstand forces of 110kN
- Comes in a range of colours and sizes to suit any environment
- Long life stainless steel frame (SS304/316) to prevent rust

If you've encountered these challenges and want to improve safety in slippery areas, it's time to shift to slip-resistant, lightweight composite fibreglass.
